

~~Image ROT~~ "Image ROT"

You can crop ~~images~~ parts of an image and then save them, or paste them on another image

→ $ball = img[y1:y2, x1:x2]$

• you can treat the ball variable as ~~part~~ of an image

$$dist_x = x_2 - x_1$$

$$dist_y = y_2 - y_1$$

• If you want to paste the image (ball) on another image, you will need $dist_x$ and $dist_y$.

and:

~~image~~ $img2[y1N:y2N, x1N:x2N] = ball$

$$y2N = y1N - dist_y$$

⑥

$$x2N = x1N - dist_x$$
